In January 2015, the Winship Cancer Institute of Emory University was awarded an Institutional Research Grant from the American Cancer Society. The goal of the ACS IRG award is to provide the institution with funds to support the early development of junior faculty in their independent cancer research careers through an annual call for pilot projects, providing a mechanism to test ideas and obtain preliminary results that will ultimately position them to successfully compete for national peer-reviewed funding.

Winship ACS-IRG pilot grant program is currently soliciting innovative pilot projects in clinical, basic, or translational cancer-related research that offer significant potential for reducing the incidence, mortality, and morbidity of cancer and/or improving the quality of life. ACS initiatives also focus on the fields of cancer prevention and cancer control and eliminating cancer disparities. Up to 4 projects may be selected per year, with $30,000 (directs) available for each meritorious proposal. Pilot projects will operate for one year, with a written progress report expected at the 12-month mark detailing outcomes from the research project and how the funds were used.

**Eligible Applicants:**
Applicants should be Assistant Professors (or equivalent) with faculty appointments of six years or less, who are eligible to apply for independent national competitive (peer-reviewed) research grants, but who currently do not hold such funding (some K-series accepted; K99/R00 excluded). Postdoctoral/clinical fellows, professors or associate professors are not eligible. Applicants are not required to be United States (U.S.) citizens, but must hold a visa that will allow him or her to remain in the U.S. long enough to complete the IRG pilot project.

ACS-IRG awardees will be mentored by a Winship Executive Committee faculty member who has expertise in the mentee’s area of research. Mentors will meet on a regular schedule with the mentee to develop an individual mentoring plan, to review scientific progress and research direction, to provide guidance in the preparation of manuscripts and subsequent grant applications, and to provide guidance in career development activities. As part of their professional development, ACS-IRG awardees will be invited to serve on the ACS-IRG Local Review Committee after the conclusion of their award, where they will be work with an Executive Committee member to review ACS-IRG proposals.
TIMELINE:

Letter of Intent (LOI) due: August 1, 2016
Selection for full proposal: August 15, 2016
Full Application Receipt date: September 15, 2016
Pilot project start date: January 1, 2017

Letter of Intent from Applicant (1-page limit)

The letter should include:
1. Name, academic title, academic department, department chair and contact information of applicant;
2. Explain the applicant’s intent for consideration to submit an ACS-IRG pilot project grant proposal. Briefly describe the applicant’s research plan, including a short statement on the research question, significance to cancer research and the proposed Aims / approaches (Abstract format).
3. A list of current / prior (last 3 years) funding

The letter of intent should be submitted as a PDF along with a current biosketch and emailed to winshipgrants@emory.edu no later than 5:00 pm on August 1, 2016

Proposals invited for a full application must use the American Cancer Society template. Application materials can be found on this website page: https://winshipcancer.emory.edu/research/funding-opportunities/acs-irg-awards.html
